AHMAD DF. *See* CLAGUE HW, AHMAD DF, *et al*

——. *See* POWER JT, AHMAD DF, *et al*

Air, inspired, negative ionisation of, effect on response of asthmatic children to exercise and inhaled histamine, 584

Airflow obstruction. *See* Airway obstruction

Airway changes, acute, induced by coughing (P), 236

disease, obstructive. *See* Airway obstruction

nasal, hyperreactivity of, fact or fiction? (P), 702

obstruction and particle size, deposition of pressurised inhalation aerosols affected by? (P), 233

obstruction, chronic, blood lactate and respiratory muscle fatigue in, 184

obstruction, chronic, breathlessness and portable oxygen in, 302

obstruction, chronic, chest wall motion abnormalities in (P), 226

obstruction, chronic, cycling for patients with (P), 240

obstruction, chronic, exacerbation of, frequency of venous thrombosis in, 605

obstruction, chronic, improvement after corticosteroid therapy, related to mood change? (P), 717

obstruction, chronic, inhaled salbutamol powder in, dose-response study of, 292

obstruction, chronic, low-dose dihydrocodeine and breathlessness in (P), 229

obstruction, chronic, paradoxical lateral ribcage motion in, mechanisms of (P), 711

obstruction, chronic, progressive exercise training in, subjective and objective changes in (P), 708

obstruction, chronic, relationship between exercise tolerance, lung function and mood in (P), 220

obstruction, chronic, response of pulmonary circulation to oral pirbuterol in (P), 708

obstruction, chronic, response to salbutamol and ipratropium bromide aerosols in, effect of oral prednisolone, 601

obstruction, chronic, severe, dyspnoea in, postural relief of, relationship to respiratory muscle strength, 595

obstruction, management of, necrotising pulmonary aspergillosis complicating, 2 cases of, 478

obstruction, reversibility of (P), 239

obstruction, sputum leukotrienes in (P), 712

obstruction, total and free plasma theophylline concentrations in (P), 704

pressure, positive, continuous, nasal, in treatment of obstructive sleep apnoea (P), 237

reactivity induced by isocapnic hyperventilation in comparison with histamine and methacholine in normal and asthmatic subjects, 766

reactivity, influence on circulating histamine and neutrophil chemotactic activity (P), 705

reactivity, relationship of adenosine-induced bronchoconstriction in asthma to (P), 705

response to terbutaline, comparison of 3 inhalation techniques, 908

responses to histamine in normal and asthmatic subjects, possible role of prostaglandins in control of, 188

responsiveness to methacholine *in vivo*, relationship to *in vitro* smooth muscle sensitivity (P), 705

Airways, large and small, in bronchial asthma, effect of beta-blockers (propranolol and pindolol), 108; *Erratum*, 400
